Full Stack Developer

I am a Full Stack Developer with 6 years of experience in creating scalable web applications. I work with technologies like React, Angular, Ionic, Next.js in frontend, and Node.js, NestJS in backend. I have experience in RESTful APIs, microservices and AWS services. My focus spans MEAN and MERN environments, and I manage databases such as PostgreSQL, Firebase, and MySQL. I am passionate about technology and collaborating in teams to deliver high quality solutions.

Core Competencies

Frontend Development React, NextJS, Angular, HTML, CSS, JavaScript, TypeScript
Backend Development NodeJS, NestJS, Socket IO, GraphQL, Apollo, Web Application Development
Database Management MongoDB, MySQL, PostgreSQL, Firebase
Cloud Services AWS, Serverless, AWS Lambda, Amazon S3
Team Collaboration Scrum, Agile, Teamwork
Languages Spanish, English

Work Experience

Consultec, Panama Dec 2025 - Sep 2026
Backend Developer

- Development and construction of web servers using microservices architecture. Implementation of event-driven communication with Kafka and containerization with Docker.

Hexa Systems Jun 2025 - Nov 2025
Full Stack Developer, Guayaquil

- Development and maintenance of scalable web applications using microservices architecture. Implementation of event-driven communication with Kafka.

Kreacia, Mexico Oct 2023 - May 2025
Full stack developer, Puebla

- Development, optimization and scalability of projects with NextJS for audiovisual distribution companies. Additionally used serverless architecture powered by AWS Lambda.

Wootic, Argentina Mar 2022 - Jan 2023
Full stack developer, Cordoba

- I participated in several projects as a Full Stack Developer, including a vendor portal for the University of Cordoba, using ReactJS, Angular, NestJS, AWS, and serverless architecture powered by AWS Lambda. I also developed two projects with Ionic and NestJS, integrating GraphQL and AWS S3 for image storage.

Woboxx, Venezuela Nov 2021 - Mar 2022
Full stack developer, Maracaibo

- Independently, I integrated templates into web applications and developed a live chat system with real-time communication using sockets, covering both frontend and backend.

Expertos de la Web, Venezuela Aug 2020 - Oct 2021
Full stack developer, Cabudare

- In Angular projects, I participated in the creation of HTML and CSS templates, and in the modular structuring with components. In the backend, I developed endpoints using Node.js with Express and MongoDB as database.
-

Education

Universidad de Carabobo, Valencia, Venezuela, Civil Engineering, Oct 2012 - Dec 2019
